New Cumberland, Pa.

GREETINGS

We wish to thank our customers, old and new, for last year's orders which were greatly in excess of any previous year. We only regret that many late orders for some varieties could not be filled. Please order early this year as stocks are limited.

As this catalog goes to press, Evie has just returned from overseas and has been discharged from the armed forces so he will be responsible for seeing that your orders are properly filled. However, Helen and Dot, who have carried on while the boys were away, must be given credit for the bulb crop which, I honestly believe, is of the highest quality that we ever grew.

LOCATION

Our warehouse is still located at New Cumberland, Pa., and all mail should be sent to that address. However, we are growing our bulbs on our farm located on Route 441 about two miles south of Middletown, Pa. Those wishing to visit our fields during the blooming season should call at the farm. The greatest number of different varieties will probably be in bloom during the period from August 15 to September 1.

GLADIOLUS DURING THE POST-WAR PERIOD

Although the war is over its effects are still with us. Therefore, even more than in normal times, we need some relaxation to relieve our pent-up emotions. A garden is perhaps the best method of obtaining this needed relaxation. If you have a garden you should include gladiolus. Because of the ease with which they may be grown, their infinite varieties of form and color, their beauty and their usefulness as cut flowers, they are, we believe, the ideal garden flower. If you have grown them in the past, we know you will wish to continue. If you have not grown them, we urge you to give them a trial this coming season.

JOIN A GLADIOLUS SOCIETY

Persons interested in the growing of gladiolus should join a society. The benefits and information received are worth much more than the dues. Some of the societies issue regular publications such as bulletins and yearbooks. Others conduct trial gardens and issue reports on the varieties grown. They all conduct shows.

VARIETIES

In our opinion, each variety listed in our catalog has merit and is worthy of your consideration. As to whether you will like a particular variety may depend on your personal preferences and the purpose for which you wish to use the flowers. Remember that the price is not an indication of the quality of the variety. Newer kinds must of necessity be higher in price because of scarcity of stock. We suggest that beginners start with tried and true varieties in order to avoid disappointment. Growers of more experience and fanciers will want to try the newer ones.

OUR GUARANTEE

All our stock is guaranteed to be healthy, vigorous, free from thrips, and true to name. **You must be satisfied.** If any stock is unsatisfactory, tell us and we will try to satisfy you. If you like our bulbs and our service, tell your friends.

PLEASE READ CAREFULLY

All quotations are subject to previous sale. We urge that you place your orders early so that you may not be disappointed. Each year we are unable to fill late orders for a number of varieties. No orders for bulblets will be accepted after April 1 as we expect to be planting bulblet stock by that time. We do not care to accept orders for bulbs after May 1, except for mixtures, as many varieties will be planted by that time. Orders are segregated as soon as possible after being received but will not be shipped until after danger of freezing is past, unless you request otherwise. However, bulbs can be sent any time desired. No substitutions will be made without your permission. If we are out of a variety you order, your money will be refunded unless you give us permission to make a substitution in size or variety. Cultural directions will be included with all orders.

Orders from the retail list amounting to \$2.00 or more will be prepaid to points in the United States. We prefer not to receive orders amounting to less than \$2.00. If such orders are sent, please include a fee of 15 cents to cover the cost of postage and packing. Prices as indicated in the quantity list are not prepaid, but are F. O. B. New Cumberland, Pennsylvania. If you wish to order part from the retail list and part from the quantity list, we will send the order transportation collect and will include extras or overcounts to make up for the transportation on the retail items. A discount of 5% will be allowed on cash orders from the retail list amounting to from \$3.00 to \$10.00. On such orders amounting to more than \$10.00 a discount of 10% will be allowed. These discounts do not apply to mixtures, to items marked "no discount" nor to orders from the quantity price list. We also include worthwhile extras with retail orders. The value of the extras will be in proportion to the size of the order. Suggest varieties desired as extras. If we have sufficient stock we will comply with your request. However, new introductions and varieties marked "no discount" cannot be used as extras.

Where a variety is listed at 2 for 20 cents or 2 for 25 cents, please do not order a smaller number at a lower price. Five bulbs will be sold at one-half the price of ten, but no single item will be accepted for less than 20 cents except when so quoted. Where no 10 price is indicated, it may be found by multiplying the price of a single bulb by 8.

Where bulblets are sold by the packet, 25 to 50 or more will be included in each packet. We will give good value.

Do not ask for special quotations unless you have a large order. Our prices are very low for the high quality bulbs offered. However, we are glad to furnish special quotations to jobbers, growers, and others purchasing in large quantities.

All bulbs listed as large size are 1 $\frac{1}{4}$ inches and up, mostly 1 $\frac{1}{2}$ inches and up, in diameter. Medium size bulbs are $\frac{3}{4}$ to 1 $\frac{1}{4}$ inches in diameter. Small bulbs are $\frac{1}{4}$ to $\frac{3}{4}$ inches in diameter. For the finest blooms, large bulbs are best. Medium size bulbs of most varieties will give nice cut flowers, but the spikes are not as long as from large bulbs. Although small bulbs of many varieties will bloom, others will not. The blooms from small bulbs will be noticeably smaller in size. Bulblets seldom bloom and are often difficult or impossible to germinate. We do not recommend them except to experienced growers.

NEW INTRODUCTIONS

During the war period, lack of help has made it impossible for us to give proper attention to our seedlings. As a result, many valuable seedlings have been lost or their propagation has been retarded. Therefore, we are not introducing any of our own originations this year. However, we urge you to be on the lookout at the shows during the summer of 1946 for our **Seedling No. 41135** which will be introduced in 1947 under the name **October Sunshine**. The color blends from orange to a golden yellow throat. It will probably win some ribbons when it is shown, but in our opinion, its greatest value will be to the back-yard gardener and to the commercial cut flower grower. This is because of its great beauty, its high color value, its ability to open in water, its vigorous growth, and its ease of propagation.

While we are not releasing anything of our own this year, we are listing several new introductions from other originators.

From Walter C. Krueger.

WAX MODEL (Krueger). A glistening white with an immaculate, small, clear lavender throat spear. The semi-recurved petals give it a distinctive appearance. It opens 5 to 6 five-inch florets on a 17 bud spike with a 22 inch flower head. It grows to a height of 60 inches and is always straight. It produces a satisfactory number of bulblets which germinate readily. As a seedling it won a number of awards during 1945. However, it is especially recommended as a commercial cut flower. Early.

Price—Large \$6.00, Medium \$5.00, Small \$4.00. No bulblets released.

(No discount.)

From Byron R. Kadel.

RED PENNY (Kadel). (Apricot Glow x Pfitzer's Triumph.) A live orange-red which is especially valuable as an early cut flower. Opens 5 medium size florets with 5 more showing color on an 18 bud spike. Height about 50 inches but can be cut low without damage to foliage. A healthy, vigorous grower which propagates rapidly. Very early.

A relatively large stock makes it possible to release this variety at a moderate price.

MAMIE (Kadel). (Picardy x Giant Nymph.) Formerly Seedling F 35. Large salmon pink, deeper in color and more pink than Picardy. Opens 5 or 6 large blooms on a tall straight spike. Has excellent cut flower habits. Midseason.

A relatively large stock makes it possible to release this at a moderate price.

FORMER INTRODUCTIONS

We have introduced the following varieties or listed them for the originator the first year of introduction:

FLORA FARMER (Quackenbush). A beautiful radiant, deep pure pink, with a creamy throat. Opens 5 to 8 large ruffled florets at a time. Nearly all of the buds show strong color at the time the first floret opens, which adds greatly to its value. Placement and attachment of florets excellent. Since large bulbs often produce two or three spikes, all eyes but one should be cut out when growing for exhibition purposes. A fancier's flower. (85 days.)

INTERMEZZO (Quackenbush). (Minuet x Picardy.) Clear cream without marking except that a faint dusting of violet rose, very deep, gives a warm tone to the throat. The florets, somewhat similar to those of Minuet, are wide open, pointed and reflexed. Opens 5 to 8 five-inch florets. Has 18 to 20 buds on spike which never crooks. Placement and attachment are excellent. The type is informal. Intermezzo is strong and healthy and is a tall grower, 52 to 55 inches or more. It blooms from any size bulb and when cut, opens up well in water. Having excellent substance and great decorative value, we believe it will prove to be a fine commercial. It makes plenty of bulblets which germinate readily and grow strongly. Winner of numerous awards. (90 days.)

JOURNEY'S END (Kadel). The happy blend of two great glads, Picardy x Pfitzer's Triumph. Opens 5 to 6 six-inch florets with 5 additional buds showing color on a 19 bud spike. The color is a deep salmon pink, blending to a deeper throat and to lighter petal margins. It will win on the show table. Winner of many awards.

MARION PEARL (Benedict) (Pearl of California x Picardy). This large formal type gladiolus is light salmon in color shading to a lighter throat, without markings. It opens up to nine florets at a time on a 55-inch spike which does not crook and which carries from 18 to 21 buds. It has wide open, somewhat ruffled, six-inch florets which stand heat well. Because of the size of the florets and the large number open it has great possibilities as a show flower.

MOTHER KADEL (Kadel) (Picardy x Spray of Gold). Medium yellow, slightly deeper in color than Mary Damaris. Entirely clear self color without marking or the slightest bit of foreign color even in its deepest throat. Opens 5 to 7 florets with 5 additional buds showing color. It makes a tall spike which does not crook. Placement and attachment are excellent. When cut it opens up well and is a good keeper. It is the best commercial cut flower yellow that we have seen. (90 days.)

PINK RADIANCE (Quackenbush) (Picardy x Minuet). Pure light pink, without marking except a very inconspicuous touch of carmine deep in the throat. Six to eight wide open florets of good size on a tall spike which never crooks. The spike is graceful. Excellent placement and attachment. Sixteen to eighteen buds. It is a vigorous grower, producing plenty of bulblets which germinate well. An excellent variety for show purposes and, in our opinion, it is the best commercial cut flower variety that we have seen. The blooming period is 85 to 90 days.

PIONEER (LaSalle). Deep salmon pink, blending to a cream throat. Grows easily 5½ feet tall, 6-inch blooms, formal placement with 6 to 8 open on an 18 bud spike. Always straight. Plant very large with wide, heavy foliage. Most large glads are inclined to be coarse, but this variety has refinement and a very beautiful clean color. Makes large bulblets which germinate readily and grow to more than average size. Midseason.

VOODOO (Kadel) (Picardy x Pfitzer's Triumph) X Bagdad. A very large intensely ruffled and fluted smoky plum colored variety that can win in its class. A close examination shows the color to be violet red etched on a cream background. However, the general impression as you stand off and look at the flower is that it is plum color. It opens 6 or 7 blooms at a time. It is a tall strong grower which produces plenty of bulblets that germinate well. The bottom floret measures 6 inches and it holds its size well as it blooms up the spike. It blooms in from 75 to 83 days after planting. If you like smokies or if you want to show in the smoky class you should try this variety.
